FHX File Explorer for DeltaV

FHX File Explorer for DeltaV allows the DeltaV Export file (FHX file) to be browsed in a tree structure similar to Microsoft's Explorer. This allows engineers to quickly access data in the DeltaV configuration offline without requiring the use of a DeltaV system.

Benefits of Using FHX File Explorer for DeltaV

- Designed to be quick and easy to use
- Allows the user to quickly trace the items in the configuration
- Can be executed offline on the users PC no DeltaV license is required.
- Allows debugging of the configuration without having a DeltaV license or even being on the DeltaV system

Scenarios Where this Application has Been Used

- It has enabled our engineers to quickly look at customers' configurations and support the operators by identifying all interlock conditions for a valve that the operators could not open.
- We have used it to identify configuration issues with clients' configurations and then walk them through a software change without connecting to the DeltaV system or being on site.
- One of our customers has it loaded on their laptops and used it for off hours support.

About Panacea Technologies

Panacea Technologies Inc. is a Process Control and Automation solutions company headquartered in Montgomeryville, PA with offices in East Greenbush, NY, Boston, MA, and Gaithersburg, MD. Panacea has been delivering cutting edge software solutions and services to our clients since 1996.
